Share the Large Screen Touch Experience

The evolution of Touch, Thin, light and on a large screen. Quickly navigate your streaming movies and share the film on a large, Full HD 19.5" PCT touchscreen. Change up old presentation slides and move to tactile models that hold audience attention. Unique multiplayer games will ultimately change your perception of playing. It's also thin and light enough to lay comfortable in your lap, so you can optimize content that you struggle to look at on a small tablet.
